SUMMARY

AI & Automation Developer at IDEaS (a SAS company) with 2+ years across 4 engineering roles, taking enterprise workflows to production automation with client stakeholders; co-built an AI voice sales agent and launched a SaaS solo.

EXPERIENCE

IDEaS Revenue Solutions (a SAS company)

Pune, India

AI & Automation Developer

Nov 2025 – Present

- Engineered a Dockerized Python pipeline of 4 modular services that generates forecast-review reports in 3 formats (PDF, Word, Excel) with LLM-written commentary (Microsoft AI Builder), through SIT, UAT and hypercare.
- Developed Playwright end-to-end checks that validate client setup (account numbers, integration types) across 3 systems: Salesforce, the G3 revenue-management UI and its database, containerized with Docker.

Business Intelligence & Automation Intern, IDEaS Revenue Solutions

Jul 2025 – Oct 2025

- Streamlined a shared customer-care mailbox with scheduled Power Automate flows that log incoming emails (chain codes, timestamps) to Excel and reconcile replies from Sent Items, saving the team ~3 hours of manual tracking.

Software Developer Intern, IDEaS Revenue Solutions

Jan 2025 – Jun 2025

- Migrated the legacy JSP/Struts "At-a-Glance" dashboard of an enterprise revenue-management product to Angular and Spring Boot, building Angular components and REST APIs over optimized SQL and Java Streams.

IFM Engineering Pvt. Ltd.

Pune, India

Security Software Intern

Jul 2024 – Dec 2024

- Identified and mitigated 3 risk classes (XSS, SQL injection, misconfiguration) in internal security audits.

PROJECTS

AI Voice Sales Agent | Python, FastAPI, OpenAI

github.com/NamanChordia07/ai-voice-sales-agent | Sep – Oct 2026

- Co-built (team of 2) an outbound AI voice agent that phones leads, runs an adaptive qualification script and hands qualified leads to sales, with do-not-call checks first and every LLM action validated.
- Owned the FreJun (Teler) telephony integration from its docs and SDK: outbound dialing, call-flow endpoint, media WebSocket and HMAC-signed webhooks; fixed 5 call-handling and agent bugs found in live testing.
- Cut median response latency to ~2.9 s and LLM reply time by 57% (1.96 s to 0.84 s) through model benchmarks, cache-friendly prompts, one deadline per turn and streamed playback; 121 automated tests.

Proofline | Python, MCP, pytest, Hypothesis

github.com/NamanChordia07/Proofline | Sep 2026

- Created an open-source verifier that checks every number in LLM-written reports against source data, diagnoses 8 error types and repairs them; ships as a pipeline-gating CLI, a Python library and an MCP server.
- Benchmarked it on 32k labeled claims: 98.9–100% recall on unseen phrasing vs. 16–20% for a naive lookup.

ClueCode | Electron, TypeScript, Next.js, PostgreSQL, Razorpay

cluecode.in | Sep 2026

- Launched a subscription desktop AI assistant solo, owning it end to end: Electron client streaming multimodal Gemini answers, Next.js/Postgres backend deployed on Vercel, auth and Razorpay billing; 270+ tests.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL

Integration & automation: FastAPI, REST, WebSockets, webhooks, telephony (FreJun, Twilio), Playwright, Power Automate

Applied AI: LLMs (OpenAI, Gemini, Claude, AI Builder), LangChain, LangGraph, voice agents (STT/TTS), MCP, evaluation

Frameworks & data: Spring Boot, Angular, Next.js, React, Electron, pandas, Streamlit, Power BI

Infrastructure: Docker, PostgreSQL, MySQL, Git, CI/CD (GitHub Actions), Vercel, Linux, debugging

EDUCATION

Vishwakarma Institute of Information Technology, Pune | B.Tech, Computer Engineering · CGPA 8.9/10

May 2025

LEADERSHIP & AWARDS

- Led 5+ security workshops and CTFs for 150+ students as Technical Head, Cyber Cell, VIIT; joint hackathon runner-up.
