

Naman Chordia

Applied AI Engineer · LLM Systems, Evaluation & Automation

Pune, India | +91 87999 55051 | namanchordia88@gmail.com

namanchordia.vercel.app | github.com/NamanChordia07 | linkedin.com/in/naman-chordia-291b7a22a

SUMMARY

Applied AI engineer who ships LLM systems to production: a real-time AI voice sales agent (STT, LLM, TTS), Proofline (verification benchmarked on 32k labelled claims), and LLM report automation at IDEaS (a SAS company).

PROJECTS

Proofline | *Python, MCP, pytest, Hypothesis* | namanchordia.vercel.app/work/proofline | Sep 2026

- Built a verifier that catches numeric hallucinations in LLM-written reports: computes facts from data, ties each claim to a metric, entity and comparison basis, diagnoses 8 error types and repairs them with minimal edits.
- Designed the evaluation with independent ground truth (3 domains, 9 error types, held-out phrasing): 98.9–100% recall at 1.1–4.5% false alarms on unseen phrasing vs. 16–20% for a naive value lookup.

AI Voice Sales Agent | *Python, FastAPI, OpenAI* | github.com/NamanChordia07/ai-voice-sales-agent | Sep – Oct 2026

- Co-built a real-time AI voice agent that qualifies sales leads over the phone: streaming speech-to-text, an LLM with schema-validated output (the model proposes, the app decides), text-to-speech and barge-in.
- Cut voice latency to a measured ~2.9 s median (end of speech to agent audio) by benchmarking models, reordering prompts for caching, one deadline per turn and streamed playback; 121 automated tests.

ClueCode | *Electron, TypeScript, Next.js, PostgreSQL, Razorpay* | cluecode.in | Sep 2026

- Shipped a desktop assistant (cluecode.in) streaming multimodal Gemini answers: model fallback, stall detection, versioned prompts with an injection guard, user keys DPAPI-encrypted; Next.js/Postgres backend, 270+ tests.

EXPERIENCE

IDEaS Revenue Solutions (a SAS company) | Pune, India

AI & Automation Developer | Nov 2025 – Present

- Added LLM-written narrative (Microsoft AI Builder) to a Python forecast-review pipeline that computes forecast vs. projections and renders PDF, Word and Excel reports; Dockerised through SIT, UAT and hypercare.
- Built a Streamlit analytics app (pandas, Altair) that automates best-available-rate trend analysis, property/chain extraction and pricing-decision validation over Excel exports.
- Built Playwright browser automation that validates client setup across Salesforce, the G3 revenue-management UI and its database, in Dockerised test environments.

Business Intelligence & Automation Intern | Jul 2025 – Oct 2025

- Automated a shared customer-care mailbox with scheduled Power Automate flows: client and system emails (chain codes, timestamps) logged to Excel, replies reconciled from Sent Items, saving the team ~3 hours of manual tracking.

Software Developer Intern | Jan 2025 – Jun 2025

- Migrated the legacy JSP/Struts "At-a-Glance" dashboard of an enterprise revenue-management product to Angular and Spring Boot, building Angular components and REST APIs over optimized SQL and Java Streams.

IFM Engineering Pvt. Ltd. | Pune, India

Security Software Intern | Jul 2024 – Dec 2024

- Detected and mitigated XSS, SQL-injection and misconfiguration risks in internal audits; automated scanning.

TECHNICAL SKILLS

AI / LLM: OpenAI, Gemini and Claude APIs, real-time voice agents (STT/TTS, barge-in), MCP, LLM evaluation, guardrails

Languages: Python, TypeScript, Java, SQL

Data & automation: pandas, Streamlit, Altair, Playwright, Power Automate, Power BI

Engineering: FastAPI, WebSockets, Next.js, Electron, Spring Boot, PostgreSQL, Docker, pytest, GitHub Actions

EDUCATION

Vishwakarma Institute of Information Technology, Pune | B.Tech, Computer Engineering · CGPA 8.9/10 | May 2025

LEADERSHIP & AWARDS

- Technical Head, Cyber Cell, VIIT (5+ security workshops and CTFs, 150+ students) · Joint runner-up, Data Viz-a-thon.
