SUMMARY

Software engineer with 2+ years across 4 roles: Java/Spring Boot and Angular modernization at IDEaS (a SAS company), Python automation and TypeScript full-stack; launched ClueCode solo with a Next.js/Postgres backend.

EXPERIENCE

IDEaS Revenue Solutions (a SAS company)

Pune, India

AI & Automation Developer

Nov 2025 – Present

- Engineered a Python report service of 4 modules (data, calculation, chart, merge) that renders forecast-review reports in 3 formats (PDF, Word, Excel) with LLM commentary; Dockerized and shipped through SIT, UAT and hypercare.
- Wrote Playwright end-to-end tests that verify client configuration (account numbers, integration types) across 3 systems: Salesforce, the G3 revenue-management UI and its database, in Docker.
- Designed a Streamlit analytics app (pandas, Altair) as 4 independent services (config, validation, calculation, charts) for best-available-rate trends and pricing-decision validation over Excel exports.

Business Intelligence & Automation Intern, IDEaS Revenue Solutions

Jul 2025 – Oct 2025

- Streamlined a shared customer-care mailbox with scheduled Power Automate flows that log incoming emails (chain codes, timestamps) to Excel and reconcile replies from Sent Items, saving the team ~3 hours of manual tracking.

Software Developer Intern, IDEaS Revenue Solutions

Jan 2025 – Jun 2025

- Migrated the legacy JSP/Struts "At-a-Glance" dashboard of an enterprise revenue-management product to Angular and Spring Boot, building Angular components and REST APIs over optimized SQL and Java Streams.
- Released the new UI behind a database-driven feature toggle (SQL migration) for a staged rollout.

IFM Engineering Pvt. Ltd.

Pune, India

Security Software Intern

Jul 2024 – Dec 2024

- Identified and mitigated 3 risk classes (XSS, SQL injection, misconfiguration) in internal security audits.

PROJECTS

ClueCode | Electron, TypeScript, Next.js, PostgreSQL, Razorpay

cluecode.in | Sep 2026

- Architected a subscription desktop app solo: Electron + TypeScript client, Next.js API on Vercel, PostgreSQL (Neon, Drizzle), Better Auth and Razorpay in an npm-workspaces monorepo; 270+ automated tests.
- Enforced 1 active device per account with server-clock session leases, heartbeats and a partial unique index; made Razorpay webhooks signature-verified and idempotent; added an audited, role-based admin console.

AI Voice Sales Agent | Python, FastAPI, OpenAI

github.com/NamanChordia07/ai-voice-sales-agent | Sep – Oct 2026

- Co-built (team of 2) an outbound AI calling system: FastAPI, a PostgreSQL work queue (SKIP LOCKED) with idempotent call attempts, WebSocket media bridging and adapters for 3 telephony providers.
- Owned the FreJun (Teler) telephony integration from its docs and SDK: outbound dialing, call-flow endpoint, media WebSocket and HMAC-signed webhooks; fixed 5 call-handling and agent bugs found in live testing.

Proofline | Python, MCP, pytest, Hypothesis

github.com/NamanChordia07/Proofline | Sep 2026

- Engineered a zero-dependency Python library and CLI that parses numbers with display-precision semantics, attributes each claim to a metric and comparison basis, and verifies 5,000+ claims per second.
- Shipped it with 71 tests, 95% coverage, mypy --strict and GitHub Actions CI/CD on 3 runtime versions.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Backend: Spring Boot, FastAPI, REST and WebSocket APIs, Node.js (Next.js API routes), PostgreSQL, MySQL, Drizzle ORM

Frontend & desktop: Angular, React, Next.js, Electron

Testing & tooling: Playwright, Vitest, pytest, Hypothesis, debugging, Docker, Git, CI/CD (GitHub Actions), Vercel, Linux

AI & automation: OpenAI, Gemini and Claude APIs, LangChain, LangGraph, voice agents (STT/TTS), MCP, Power Automate

EDUCATION

Vishwakarma Institute of Information Technology, Pune | B.Tech, Computer Engineering · CGPA 8.9/10

May 2025

LEADERSHIP & AWARDS

- Led 5+ security workshops and CTFs for 150+ students as Technical Head, Cyber Cell, VIIT; joint hackathon runner-up.
