

# Naman Chordia

Applied AI Engineer · LLM Systems, Evaluation & Automation

Pune, India | +91 87999 55051 | namanchordia88@gmail.com

namanchordia.vercel.app | github.com/NamanChordia07 | linkedin.com/in/naman-chordia

## SUMMARY

Applied AI engineer who makes LLM output trustworthy enough to ship: Proofline (report verification benchmarked on 32k labelled claims), LLM commentary in IDEaS (a SAS company) report automation, a production multimodal Gemini app.

## PROJECTS

**Proofline** | *Python, MCP, pytest, Hypothesis* github.com/NamanChordia07/proofline | Sep 2026

- Built a verifier that catches numeric hallucinations in LLM-written reports: computes facts from data, ties each claim to a metric, entity and comparison basis, diagnoses 8 error types and repairs them with minimal edits.
- Designed the evaluation with independent ground truth (3 domains, 9 injected error types, held-out phrasing): 98.9–100% recall at 1.1–4.5% false alarms on unseen phrasing vs. 16–20% for a naive value lookup; ablations show a fixed  $\pm 1\%$  tolerance yields 24–29% false alarms.
- Shipped as a Python library, CI-gating CLI and an MCP server agents can call, with a guarded Gemini/Claude loop (draft, verify, targeted feedback, deterministic repair); 71 tests, 95% coverage, mypy --strict.

**ClueCode** | *Electron, TypeScript, Next.js, PostgreSQL, Razorpay* cluecode.in | Sep 2026

- Shipped a Windows desktop assistant (cluecode.in) that sends screen captures to Gemini with the user's own key and streams answers into an overlay: model discovery and fallback, stall detection, versioned prompts with a prompt-injection guard, keys encrypted with Windows DPAPI and never sent to the server.
- Built the Next.js/Postgres backend (auth, Razorpay subscriptions, device-session leases, admin console) with 270+ automated tests, including Electron security and WCAG 2.1 AA end-to-end suites.

## EXPERIENCE

**IdeaS Revenue Solutions (a SAS company)** Pune, India

**AI & Automation Developer** Nov 2025 – Present

- Added LLM-written narrative (Microsoft AI Builder) to a Python forecast-review pipeline that computes forecast vs. projections and renders PDF, Word and Excel reports; Dockerised through SIT, UAT and hypercare.
- Built a Streamlit analytics app (pandas, Altair) that automates best-available-rate trend analysis, property/chain extraction and pricing-decision validation over Excel exports.
- Built Playwright browser automation that validates client setup across Salesforce, the G3 revenue-management UI and its database, in Dockerised test environments.

**Business Intelligence & Automation Intern** Jul 2025 – Oct 2025

- Automated a shared customer-care mailbox with scheduled Power Automate flows: client and system emails (chain codes, timestamps) logged to Excel, replies reconciled from Sent Items, saving the team ~3 hours of manual tracking.

**Software Developer Intern** Jan 2025 – Jun 2025

- Migrated the legacy JSP/Struts "At-a-Glance" dashboard of an enterprise revenue-management product to Angular and Spring Boot, building Angular components and REST APIs over optimized SQL and Java Streams.
- Added custom date-range APIs and shipped the new UI behind a SQL feature toggle for a controlled rollout.

**IFM Engineering Pvt. Ltd.** Pune, India

**Security Software Intern** Jul 2024 – Dec 2024

- Detected and mitigated XSS, SQL-injection and misconfiguration risks in internal audits; automated scanning.

## TECHNICAL SKILLS

**AI / LLM:** Gemini and Claude APIs, Microsoft AI Builder, MCP, LLM evaluation and benchmarking, guardrails, multimodal input, streaming

**Languages:** Python, TypeScript, Java, SQL

**Data & automation:** pandas, Streamlit, Altair, Playwright, Power Automate, Power BI

**Engineering:** Next.js, Electron, Spring Boot, PostgreSQL, Docker, pytest, Hypothesis, GitHub Actions

## EDUCATION

**Vishwakarma Institute of Information Technology, Pune** | B.Tech, Computer Engineering · CGPA 8.9/10 May 2025

## LEADERSHIP & AWARDS

- Technical Head, Cyber Cell, VIIT (5+ security workshops and CTFs, 150+ students) · Joint runner-up, Data Viz-a-thon.
